Summary

I am a passionate software engineer with 6+ years of experience in developing web applications and backend systems, Skilled at writing clear, concise code that is easy to maintain and troubleshoot. Experienced in working with both small and large teams across multiple projects and companies. Able to work independently of remote locations or in office environments as needed by the company. Always learning new things and improving myself and others.

Education

- 2021 to 2024: Advanced Diploma in Computer Systems Engineering.
- 2015 to 2018: National Diploma in Information Technology (Intelligent Industrial Systems).
- 2024 to 2024 December: Harvard cs50 introduction to computer science.

Professional Experience

Analyst Software Developer

Invantage

Academic Management Information System and Insurance Management System (June 2021 to August 2025)

- Involved in the full SDLC process, .net core 6, Bootstrap, Angular 8.
- Successfully created and enhanced microservices for Open Learning Group.
- Successfully created, enhanced and maintained BOTS and microservices for Kaelo.
- Successfully created, enhanced and maintained a microservice for Dis-Chem.

Apex Real Time Solutions

Supply chain and logistic System (September 2018 to June 2021)

- Involved in the full SDLC process, asp.net, Bootstrap, Angular js, node js.
- Successfully created and enhanced and maintained a Management Information System for MTN.
- Successfully create, enhance and maintain features in the WMS and WCS system for MTN.
- Successfully created reports for CellC.

Key Achievements

- Created the Dis-Chem extra microservice that activated customers so that they get their discounts in Dischem stores.
- Created the Kaelo chat bot that helped reduce a lot of Kaelo call center volume.
- Created Open learning group: Student Information Microservice, Student registration microservice, enhanced the OLG report microservice.
- Created MTN's MIS system to ensure MTN management and supervisors can see reports of production progress in the warehouse.
- Enhanced or improved MTN Warehouse production by adding features to the WMS and WCS that made the whole order processing process much easy for the warehouse team.

Technical Toolbox

Big O Notation, DDD, SOLID and Dry design patterns, Clean Architecture, OOP and procedural, Agile, Reactive Architecture.

Data Science: AI, Machine Learning, Deep Learning.

DevOps: Azure DevOps, IBM DevOps

Project Management: Agile.

Certificates: FreeCodeCamp Full Stack Developer, FreeCodeCamp Data Structures and Algorithms.

Infrastructure: Virtualization

Serverless Architecture: IBM cloud, AWS cloud (Amazon EC2 instances), Heroku

Cloud PAAS: AWS Cloud, IBM Cloud and Heroku.

Datastructures and algorithms: Stacks, Queues, Lists, Linked lists, Arrays, Sets. Binary search, bubble sort, linear search, merge sort, quick sort.

Web Development : PHP, HTML5, ASP.Net, JavaScript, JSON, XML, jQuery, Bootstrap, Visual Basic.Net, Borland C++, ASP.Net MVC, .Net Core 6, .Net Core 5, Django, Web Services, Angular 10, Angular 8, Angular js, reactjs, Ajax and Node js, CICD.

Web Services and Apis: node js, Asp.net, .Net Core 5, .Net Core 6, Vb.net, Django.

Embedded Development : node js for raspberry pi, Vhdl (using Alteraboard), Arduino for Arduino micro-controller, Assembler Programming for 8051 and for pic16f627a, C programming for 8051 and for pic16f627a.

Automation Engineering : Siemens Ladder Logic for Siemens PLC's.

Data analysis : VBA, Node Js, D3 js , Python, Java and C#.

Database Development : MySQL, mongodb, MS Access, MS SQL Server 2017, PGSQL, TSQL. Debuggers : Firebug and Browser (Chrome, FireFox and Internet Explorer) DeveloperTools, AWS RDS: Mssql, Aurora

MicroController / Controller : RaspberryPi (IOT), Arduino, Pic16f627a, 8051 Microcontroller, Siemens PLC, Altera board.

Technical Integrations : Rest api, Web Api Cloud: Paas, Saas and DbaaS (IBM Cloud, Heroku).

Cloud DBaaS: Mongodb atlas, IBM Cloudant, Heroku Postgres, AWS RDS (different db types).
